

# Lab Safety

# Lab Safety

- No eating, drinking, snus use, or applying cosmetics. Use gloves when handling lead bricks.

# Lab Safety

- No eating, drinking, snus use, or applying cosmetics. Use gloves when handling lead bricks.
- Handle radioactive sources with care, and only as instructed. Notify the supervisor immediately if a source is dropped, scratched, or otherwise damaged, *especially* thin-window sources.

# Lab Safety

- Do not touch any high voltage equipment without instructor supervision.

# Lab Safety

- Do not touch any high voltage equipment without instructor supervision.
- In the event of an electrical fire, use a CO<sub>2</sub> fire extinguisher.

# Lab Safety

- Do not touch any high voltage equipment without instructor supervision.
- In the event of an electrical fire, use a CO<sub>2</sub> fire extinguisher.
- Wash hands after handling any radioactive sources or lead bricks (even with gloves).

- In the event of an electrical fire, use a CO<sub>2</sub> fire extinguisher.
- Wash hands after handling any radioactive sources or lead bricks (even with gloves).
- Pregnant or nursing participants are eligible for exemption from lab work, but must still write a report from peers' data.

# Report Guidelines

# Report Guidelines

- Two students per report.

# Report Guidelines

- Two students per report.
- Ideal reports are concise, demonstrating comprehension in theory, methods, and data analysis.  $\leq 10$  pages.

# Report Guidelines

- Two students per report.
- Ideal reports are concise, demonstrating comprehension in theory, methods, and data analysis.  $\leq 10$  pages.
- TIP #1—Follow the handouts on error analysis before starting the report. Demonstrating your understanding here is the basis for making any sense.

- TIP #1–Follow the handouts on error analysis before starting the report. Demonstrating your understanding here is the basis for making any sense.
- TIPS #2 & 3–Keep theory brief.

# Report Guidelines

- Reports will be graded on a percent scale:
  - 50% passing
  - 70% some serious problems
  - 90% excellent

# Report Guidelines

- Reports will be graded on a percent scale:
  - 50% passing
  - 70% some serious problems
  - 90% excellent
- The report hand-in deadline is 10 business days after the day you work in each lab. On-time submissions can be reworked for a better grade.
